PRE-OPERATIVE ANTIBIOTIC REFERENCE --- NO ORDERS ON THIS PAGE

True drug allergy is based on the presence of a patient response with one or more of the following signs/symptoms: respiratory difficulty, hypotension, rash, or hives. In the absence of these findings, an antibiotic of the same classification may be used for surgical prophylaxis.

Indication	Pre-op Antimicrobial & Dose
Abdominal: Esophageal, Bariatrics; Gastroduodenal; Biliary non infected; **Gynecological:** C-section [administer within 60 minutes prior to incision); *before* cord clamping]	Cefazolin 2 g (3g if >120 kg) IV x 1 dose **Allergy**: clindamycin 900mg IV + gentamicin 5 mg/kg IV x 1 dose
Abdominal: appendectomy, biliary infection, colorectal surgery of any type, whipple or small bowel	Colorectal prep: neomycin sulfate 1 g + erythromycin base 1g PO at 19, 18, & 9 hours prior to surgery (**home therapy**) + cefoxitin 2 g IV x 1 dose **Allergy**: metronidazole 500 mg IV + gentamicin 5 mg/kg IV x 1 dose
General: any implanted foreign body; hernia repair; PEG tubes; **Head & Neck:** clean procedures; **Plastic Surgery**	Cefazolin 2 g (3 g if >120 kg) IV x 1 dose **Allergy**: clindamycin 900mg IV x 1 dose
Cardiac: coronary artery bypass graft (CABG) +/- valve implant, pacemaker & other implants	Cefazolin 2 g (3g if >120 kg) IV x 1 dose **Allergy**: vancomycin 15 mg/kg IV + gentamicin 5 mg/kg IV x 1 dose <u>MRSA concern</u>: vancomycin 15 mg/kg IV + cefazolin 2 g (3 g if >120 kg) IV x 1 dose **Allergy**: vancomycin 15 mg/kg IV + gentamicin 5 mg/kg IV x 1 dose
Cardiac: pacemaker, defibrillator, ventricular assist device, & other implanted device	Cefazolin 2 g (3g if >120 kg) IV x 1 dose **Allergy**: clindamycin 900mg IV x 1 dose **Allergy**: vancomycin 15 mg/kg IV x 1 dose
Gynecological: all hysterectomy Synthetic pubovaginal sling	cefoxitin 2 g IV x 1 dose **Allergy**: Clindamycin 900 mg IV + gentamicin 5 mg/kg IV x 1 dose
Head & Neck Clean-contaminated procedures (oropharyngeal mucosa is compromised)	Ampicillin/sulbactam 3g (1.5g if less than 80kg) IV x 1 dose **Allergy**: clindamycin 900 mg IV x 1
Neurosurgery: craniotomy, shunts, laminectomies, & spinal fusion; **Thoracic**: non-cardiac	Cefazolin 2 g (3 g if >120 kg) IV x 1 dose **Allergy**: vancomycin 15 mg/kg IV x 1 dose
Orthopedic: internal fixation of fracture & joint replacement (hip or knee), any implanted foreign body	Cefazolin 2 g (3 g if >120 kg) IV x 1 dose **Allergy**/MRSA concern: vancomycin 15mg/kg IV x 1 dose **complete infusion before tourniquet inflation** Gentamicin 5mg/kg IV x 1 dose (if gram negative concern)
Urologic: TURP only, otherwise ***indicated only for patients with known bacteriuria***	Cefazolin 2g (3 g if >120 kg) IV x 1 dose **If catheter in place**: Ampicillin 2 grams IV q6h + Gentamicin 5 mg/kg IV once **Allergy**: clindamycin 900mg IV x 1 dose + gentamicin 5mg/kg IV x 1 dose
Urologic: transrectal biopsy	Gentamicin 80mg IV + Ciprofloxacin 400mg IV x1 cefoxitin 2g IV once
Urologic: Open/lap; cystoscopy with manipulation or upper tract instrumentation (lithotripsy, ureteroscopy)	Cefazolin 2 g (3 g if >120 kg) IV x 1 dose + gentamicin 5mg/kg IV x 1 dose **Allergy**: clindamycin 900mg IV + gentamicin 5mg/kg IV x 1 dose
Urologic: prosthetics, stents, penile prosthetics	Cefazolin 2 g (3 g if >120 kg) IV x 1 dose + gentamicin 5mg/kg IV x 1 dose **Allergy**: vancomycin 15mg/kg IV + gentamicin 5mg/kg IV x 1 dose
Vascular: amputation, arterial surgery, vascular access devices, implants, repair	Cefazolin 2 g (3 g if >120 kg) IV x 1 dose **Allergy**: vancomycin 15mg/kg IV + gentamicin 5mg/kg IV x 1 dose

SHORT STAY FORM

Patient Consent to Medical Treatment or Surgical Procedure and Acknowledgement of Informed Consent

READ CAREFULLY BEFORE SIGNING

TO THE PATIENT: Your physician has recommended that you consider medical treatment/surgery. Louisiana law requires your physician to tell you (1) the nature of your condition; (2) the general nature of the medical treatment/surgery; (3) the risks of the proposed treatment/surgery, as defined by the Louisiana Medical Disclosure Panel or as determined by your doctor; (4) reasonable therapeutic alternatives and material risks associated with such alternatives; and (5) risks of no treatment.

You have the right, as a patient, to be informed about your condition and the recommended surgical, medical or diagnostic procedure to be used so that you make the decision whether or not to undergo the procedure after knowing the risks and hazards involved. Your physician wants you to be as informed as possible. Please read each page of this form carefully. Ask about anything you do not understand and your physician will be pleased to explain.

1. Patient Name: ____

2. Treatment/Procedure: ____

3. Anesthesia to be used: GENERAL: ____________ OTHER: ____________

4. Description of the treatment/procedure: ____

5. Indications for treatment/procedure: ____

6. Anticipated Benefits of the Treatment/Procedure: ____

7. **Material Risks of Treatment/Procedure:**

All medical or surgical treatment involves risks. Listed here and on the attached pages that relate to your specific treatment/procedure are risks associated with this treatment/procedure , its recuperation, and anesthesia, including the likelihood of the risks, based on the available clinical evidence, as informed by the responsible physician's clinical judgment. Material risks could include risks with a high degree of likelihood but a low degree of severity, as well as those with a very low degree of likelihood but high degree of severity that we believe a reasonable person in your (the patient's) position would likely consider significant when deciding whether to have or forego the proposed therapy. Please ask your physician if you would like additional information regarding these risks.

a) Risks generally associated with any surgical treatment/procedure,including anesthesia are: **death, brain damage, disfi guring scars, quadriplegia (paralysis from neck down), paraplegia (paralysis from the waist down), the loss or loss of function of any organ or limb, infection, bleeding, and pain.**

b) ____Risks listed for your procedure by the Louisiana Medical Disclosure Panel: ______________________________

____

_____ _Risks determined by your physician : ____

c) Additional risks (if any) particular to the patient because of a complicating medical condition:__. ______________________

8. Treatment alternatives including attendant risks and benefits: ____

READ CAREFULLY BEFORE SIGNING

Informed Consent- Transfusion of Blood and Blood Components

Patient Instruction sheet- Not part of the medical record

WHAT IS A BLOOD TRANSFUSION

You may need to receive blood in order to stabilize your condition or to save your life. The type of transfusion and amount of blood that is given to you is a decision your physician will make based on your individual needs. Blood transfusions are given to replace the part of the blood that is missing. If you are anemic, your red blood cell level is lower than the level needed to carry adequate oxygen to the cells in your body. The transfusion given to correct anemia contains red blood cells. If you have a low platelet count and are at risk for bleeding, the component given to you is a platelet concentrate. Plasma or Cryoprecipitate are given to manage clotting problems.

WHAT ARE THE SIDE AFFECTS

Most transfusions proceed without incident. Occasionally, problems arise. You may feel a cold sensation, due to the cool temperature of the blood. Sometimes, fever, chills and hives can occur, which are usually not significant. Rarely, more serious problems, such as infection, shortness of breath, back or chest pain, nausea, vomiting, fainting, or confusion may occur. If you have any of these symptoms during or after the transfusion, immediately call your Nurse or Doctor for assistance. If you have bleeding from the infusion site, you or your Nurse should apply firm pressure directly to the area until the blooding stops.

Delayed reactions may occur days to weeks after a transfusion. Any changes in your general health such as unusual tiredness, change in appetite, unplanned weight loss, kidney failure, dark urine, yellowing eyes or skin (jaundice), swollen glands or heavy sweating at night should be immediately reported to your Doctor.
